

EZI - ROLL ROLLER SHUTTER DOORS IN CYCLONIC AREAS

The roller doors shown below have been tested to withstand a wind pressure of 3.2kPa at maximum opening width of 6m.

EZI - ROLL doors are manufactured from G300 steel sheet, base metal thickness 1.00mm for 3 - 6m openings, 0.8mm for 0 - 3m openings.

Wind locks are incorporated in each slat. Doors can be either hand operated or electrically driven.
